

Chin Man Yeung

Software Engineer • UI / UX Developer

Experience

Frontend Developer

Freelance

Jan 2008 - Present • +10 years • Spain / Germany

After years of successfully developing medium to large projects for SME's and conferences, I learned to build **strong client relationships** through prompt and transparent **communication**. I am flexible in terms of technology choice taking into account the requirements of my client. I am committed to deliver on time, with high code standards to ensure optimal **performance**, **scalability** and **maintainability**.

Frontend / UX Developer

Talon.One GmbH

May 2016 - Jan 2018 • 1 year & 6 months • Berlin, Germany

At Talon.One, I was fortunate to join and learn from a talented team of senior developers. I was entrusted with the **user experience research**, the implementation of the campaign manager interface with **React**, the creation of a **design system** and its **style guide** for visual consistency. Additionally, I **mentored 2 junior developers** and assisted in the **recruitment of 3 engineers**.

Frontend Developer

HitFox Group GmbH

Jun 2015 - May 2016 • 1 year • Berlin, Germany

In the TechDev team, I worked closely together with the designers and acquired experience in crucial research and design processes such as prototyping and validation. Using **Ruby on Rails**, I bootstrapped **Pair Finance**, pushed new features at **Clark** and facelifted the landing page of **Valendo**. Lastly, I built the corporate site of **solarisBank** and its back office system.

Lead Frontend Developer

labfolder GmbH

Jan 2013 - Dec 2014 • 2 years • Berlin, Germany

Being among the first employees, I experienced the rhythm of an early stage startup. In charge of refactoring the frontend codebase, I introduced newer technologies such as **Angular** to implement a scalable client-side **MVC architecture**. I coordinated the efforts of our second frontend developer and led a major redesign using modern **CSS preprocessors**.

Marketing Manager

Molnár Institute for Applied Chromatography

Jan 2012 - Jul 2012 • 7 months • Berlin

Introduced **Analytics**, **SEO** and **HTML newsletter** campaigns to gather insights about our performance which enabled us make data-driven decisions to boost the conversion rate and obtain valuable leads.

Library Technician

UPC - Universitat Politècnica de Catalunya

Oct 2009 - Dec 2010 • 1 year & 3 months • Barcelona

Apart from my work as a library technician in charge of 6 interns, during my spare time I developed a CRM for the library's contacts and a collection visualization using Google Maps.

Company Manager

CPET - Centre de Publicacions del Campus Nord SCCL

Feb 2007 - Oct 2009 • 2 years & 9 months • Barcelona

I had the wonderful opportunity to lead and coordinate a team of 24 student workers, to manage the accounting, finances, legal and human resources of a non-profit cooperative.

About

Hi, my name is Chin Man and I am a software engineer from Spain currently based in Berlin.

My professional career revolves around new web technologies. Frontend development offers me the opportunity to bridge the gap between users' needs and digital solutions. I honestly found my passion working with human factors and cognitive ergonomics.

Apart from UI and UX paradigms, my interests not only include entrepreneurship and tech-related topics, but also disciplines such as pure sciences and arts.

Education

Master of Science (M.Sc.), in Human-Computer Interaction

KTH - Royal Institute of Technology | UTwente - University of Twente

Aug 2017 - Jun 2018 • Stockholm, Sweden | Sep 2018 - Present • Enschede, Netherlands

The Masters program is a double degree that provides me with the perfect framework to acquire fundamental entrepreneurship skills while learning cutting-edge technology in two major tech hubs of Europe. Aside from the courses covering advanced concepts in Human-Computer Interaction and Design, my specialization in Intelligent Systems features Machine Learning, Natural Language Processing, Information Retrieval, and Data Science.

Bachelor of Science (B.Sc.), in Computer Science

UOC - Open University of Catalonia

Sep 2007 - Jul 2012 • 5 years • Barcelona, Spain

The Bachelor studies awarded me with a solid base in programming and a deep understanding in software and hardware. The programming languages were mainly Java for general purpose and C++ for modules dealing with lower level systems. Although my assignments had a focus on databases and networks, the holistic mix of theoretical and practical education provided me with the skills to face any kind of software challenge with confidence.

Extracurriculars

Curator

Techstar Startup Digest

Sep 2017 - Jun 2018 • Stockholm, Sweden

Event Assistant

Pictoplasma Conference

Apr 2013 - 2014 • Berlin, Germany

Event Assistant

Berlin Music Week

Sep 2013 • Berlin, Germany

Event Coordinator

FuturCivil Jobs Fair

Feb 2007 - 2009 • Barcelona, Spain

Event Coordinator

Data Natives Conference

Nov 2015 • Berlin, Germany

Volunteer Coordinator

Social Media Week Berlin

Sep 2012 - 2013 • Berlin, Germany

Event Assistant

Tech Open Air Conference

Jul 2013 • Berlin, Germany

Event Coordinator

Telecogresca Festival

Feb 2007 - 2009 • Barcelona, Spain

Additional

Business Summer School

EIT Digital Academy

Aug 2018 • Machine Learning • Budapest

Ableton Live Course

Acusmatica S.L.

Aug 2010 • 1 month • Valencia

IX Design Specialization

University of California, San Diego

Jan 2017 - Present • 8 Courses • Coursera

Autocad 2D/3D Course

Criteria Formación S.L.

Feb 2009 • 2 months • Barcelona
